ADD TO COMPARE

All transmission and blocking (OD) data are actual, measured spectra of representative production lots. Spectra varies slightly from lot to lot. Optical density values in excess of 6 may appear noisy because such evaluations push the resolution limit of low light level measurements.

Overview

Filter Support

Multiphoton shortpass laser dichroic

Number

ZT775sp-2p

Type

BS

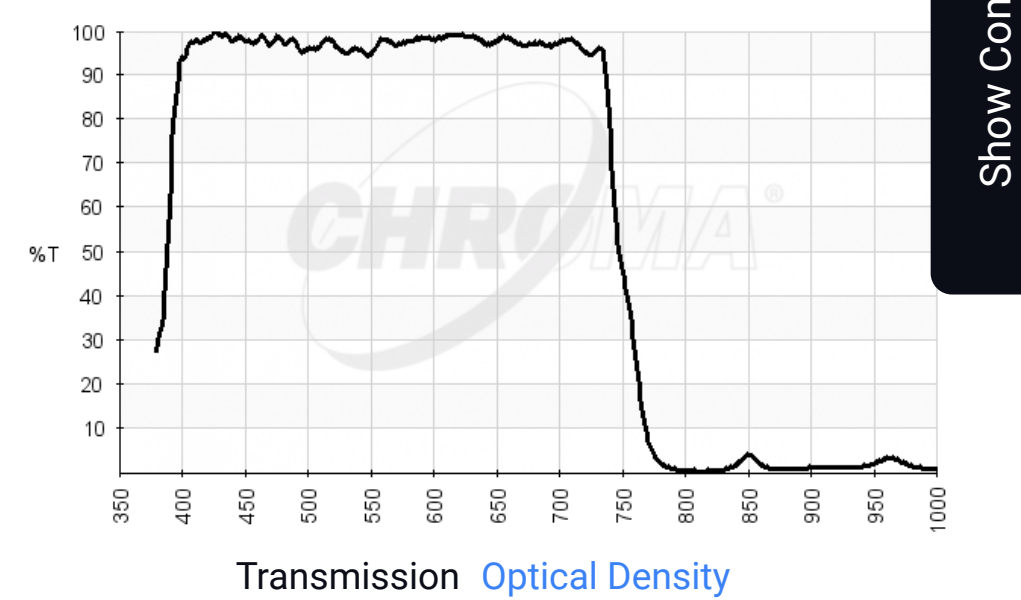

Wavelength (CWL)

747nm

Sizing and Prices

The price listed is for standard sizes only (up to 25mm and dichroics up to 26x38mm.)

For filters larger than 25mm and dichroics larger than 26x38mm please contact us for pricing.

Show Compare

If you don't see what you are looking for, please [contact us](#). We have a large inventory of filters and a knowledgeable staff ready to help you design and build a filter to meet your specifications.
